

## Content Validation System (CVS)

LTC Gene Swisher  
Chief, Technical Management Division

*Experience a Training Revolution!*

## What is a CVS?

- **Content Validation System**
- **Used for content testing, prior to loading final versions of courseware on the production LMS**
- **Courseware Developers/Proponents will be granted access to the CVS to test their content prior to sending their final version for Q&A testing by DLS**
- **Developers supporting agencies will be provided access to use the DTF to test courseware**
- **Developers need to contact their local DTFM to coordinate access**
- **Developers/Proponents will be testing courseware under their designated security domain set up by the CVS System's Administrator**

## CVS Account Set Up

➡ **Send requests to [dlstesting@tadlp.army.mil](mailto:dlstesting@tadlp.army.mil)**

➡ **Required information:**

- Name
- Phone number
- AKO email address
- Proponent
- Role

➡ **Once your account is set up, you will be notified with your user id and password**

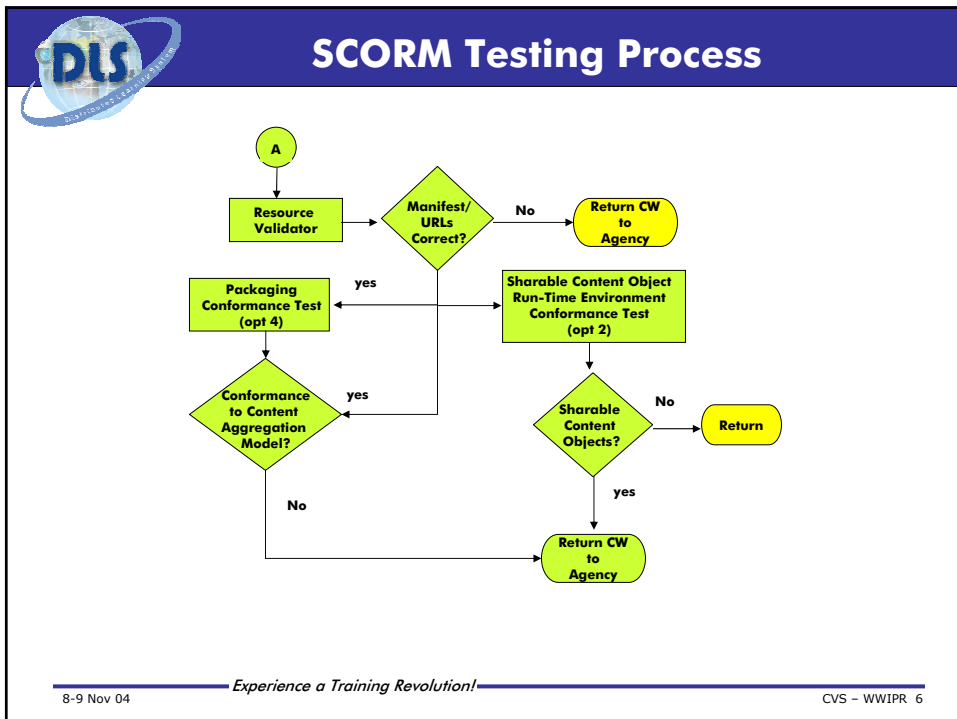

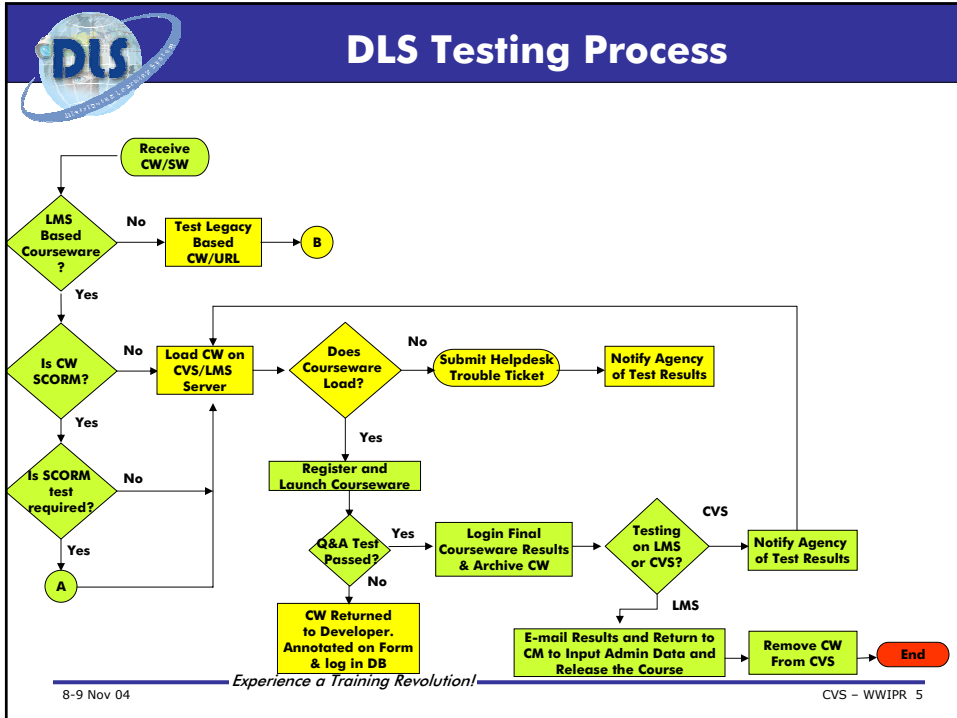

## CVS Process Flows

➡ **DLS Testing Process – DLS will test CD ROM based courseware, URLs, and courseware developed for web based distribution for playability on Saba LMS**

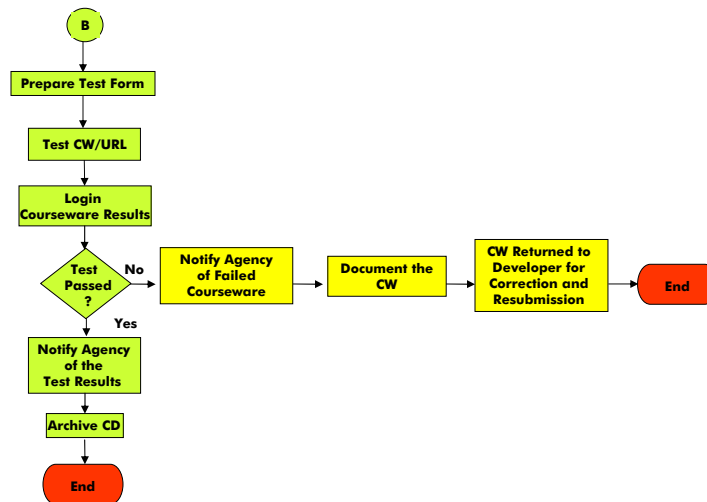

➡ **SCORM Process will test for compliancy**

➡ **Legacy Based Courseware process will test for playability**

## Legacy Based CW Process
